

Data Flow Diagram

Date	04 July 2026
Team ID	
Project Name	Rising Waters - ML-Based Flood Prediction System
Maximum Marks	2 Marks

Data Flow Diagram

The diagram below shows how data moves through Rising Waters – between the user, the meteorological data source, the prediction processes, and the data stores that hold the trained model and prediction records.

DFD Symbol Legend

Symbol	Name	Description
	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Meteorological Data Source).
	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Input, Generate Prediction).
	Data Store	A place where data is held for later use (e.g., Feature Store, Model Store, Prediction Log).
	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Rising Waters – Data Flow Diagram:

The diagram on the next page shows the flow of data through the Rising Waters flood-prediction system.
